2.Total Laid off by the company Each :

An overview ranking companies by total layoffs. This helps identify firms that executed significant workforce reductions and understand industry-wide downsizing patterns.

company	sum(total_laid_off)
Amazon	18150
Google	12000
Meta	11000
Crypto	10583
Salesforce	10090
Microsoft	10000
Philips	10000
Ericsson	8500
Uber	7585
Dell	6650
Booking.c...	4601
Cisco	4100
Deloitte	4084

3.Total Laid off by the Industry Each:

Industries such as technology, retail, and finance tend to show higher layoff volumes due to automation, economic shifts, and competitive pressures.

industry	sum(total_laid_off)
Consumer	45182
Retail	43613
Other	36209
Transportation	33548
Finance	28344
Healthcare	25894
Food	22855
Real Estate	17565
Travel	17159
Hardware	13828
Education	13338
Sales	13216
Crypto	10583
Marketing	10258

4.Most Laid Off by the industry Each :

This section identifies industries with the highest layoffs, highlighting macroeconomic trends and market corrections affecting multiple companies simultaneously

industry	sum(total_laid_off)
Consumer	45182
Retail	43613
Other	36209
Transportation	33548
Finance	28344
Healthcare	25894
Food	22855
Real Estate	17565
Travel	17159
Hardware	13828
Education	13338
Sales	13216
Crypto	10583
Marketing	10258

5.Total Laid off by the Year :

Year-wise layoff data shows trends such as recession-driven spikes, pandemic recovery adjustments, or cost-cutting cycles in global markets.

year(`date`)	sum(total_laid_off)
2023	125677
2022	160322
2021	15823
2020	80998
NULL	500

6.Average Laid off by the company (Each):

This metric provides a normalized view of layoffs, allowing fair comparison across small and large companies.

company	avg(total_laid_off)
Google	12000.0000
Meta	11000.0000
Microsoft	10000.0000
Ericsson	8500.0000
Dell	6650.0000
Amazon	6050.0000
Philips	5000.0000
Cisco	4100.0000
IBM	3900.0000
SAP	3000.0000
Salesforce	2522.5000
Booking....	2300.5000
Byju's	2000.0000
Carvana	2000.0000

7.Month By Year (Increment in the company(Rolling laid off sum)):

A rolling analysis uncovers patterns such as seasonal workforce adjustments or responses to market shocks.

month	total_off	rl
2020-03	9628	9628
2020-04	26710	36338
2020-05	25804	62142
2020-06	7627	69769
2020-07	7112	76881
2020-08	1969	78850
2020-09	609	79459
2020-10	450	79909
2020-11	237	80146
2020-12	852	80998
2021-01	6813	87811
2021-02	868	88679
2021-03	47	88726
2021-04	261	88987

8. Ranking of the Laid off by the company (years):

This ranking captures how companies change their layoff strategies over time, revealing organizational stability or volatility.

company	years	tl	d
Uber	2020	7525	1
Booking.com	2020	4375	2
Groupon	2020	2800	3
Swiggy	2020	2250	4
Airbnb	2020	1900	5
Bytedance	2021	3600	1
Katerra	2021	2434	2
Zillow	2021	2000	3
Instacart	2021	1877	4
WhiteHat Jr	2021	1800	5
Meta	2022	11000	1
Amazon	2022	10150	2
Crypto	2022	8153	3
Cisco	2022	4100	4

Overall Insight

The analysis reveals that layoffs are not uniformly distributed—specific industries and companies face higher impact due to economic conditions, technological disruption, and global market shifts. Rolling trends also help forecast potential future instability.
